

Lorikeets & Rosellas – Excursion to Royal Botanic Gardens

What a marvellous day we had at the Royal Botanic Gardens! The children had a wonderful time fossicking under trees and collecting leaves, seed pods and other special things. We saw some strangely shaped trees, banana trees and a huge old palm tree and discovered the Bunya Bunya palm (a plant the dinosaurs used to eat). The children had the opportunity to explore all the exciting smells in the herb garden and made a smelling bag to take home. We also searched for vegetables in the vegetable garden. The children potted up pea seeds to care for and learned about worms before having the chance to have a very "close up" look at them. We are certain the children will have many happy memories of this day and we can't forget a HUGE THANK YOU to the parents who came along with us and helped to make it such a special day!
