

The Responsible Pet Ownership Program – Lorikeets & Rosellas

Lydia brought along her special dog "Star" for the children to practice with. She spoke to the children about looking at a dog's "body language" to find out if a dog is relaxed, frightened or angry, and then they pretended to be frightened and angry dogs. Lydia taught the children what to do if an angry dog approaches them and importantly when to leave a dog alone. They then discussed the safe way to approach a dog. The children have gained valuable skills from this visit.
